Objective

Full Stack Developer | React.js, Next.js, Java, Spring Boot, Quarkus, C#, SQL Server

Summary

Full Stack Developer with 3+ years of experience delivering complete solutions — from Figma design to automated deployment. Focused on performant interfaces with React/Next.js and scalable back-ends with Java and Spring Boot. Creator of Metrifica, a self-built SaaS for management and budgeting with fully authored architecture. 10+ projects shipped to production across internal systems, institutional websites and digital products.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, TailwindCSS, HTML5, CSS3, Vite, Framer Motion, Responsive Design

Backend: Java, Spring Boot, Quarkus, C#, Node.js, Delphi, REST APIs, Microservices

Databases: SQL Server, PostgreSQL, MySQL, Supabase

Tools: Git, GitHub Actions (CI/CD), Figma (UI/UX), Docker, Scrum, Jira

Professional Experience

Software Developer — Titaniumfix

December 2023 – Present | São José dos Campos, SP

- Built complete interfaces in **Next.js** for 5+ internal systems, reducing UI rework and standardizing user experience

- Implemented back-end in **C# and Java** with **microservices** architecture, ensuring scalability and efficient cross-system communication
- Created **custom dynamic reports** that replaced manual processes, optimizing operational data analysis
- Prototyped interfaces in **Figma** before development, reducing revision cycles and aligning expectations with stakeholders
- Automated **CI/CD pipelines with GitHub Actions**, eliminating manual deploys and ensuring continuous and secure deliveries
- Refactored and evolved legacy systems, improving performance and maintainability of existing codebase
- Participated in **technical planning** and architecture definition for new projects, contributing to strategic decisions with the team
- **Scrum** methodology — active participation in sprints, dailies and retrospectives

IT Assistant — Titaniumfix

February 2023 – January 2024 | São José dos Campos, SP

- Led the implementation of an **ERP** system, mapping business processes and translating rules into system configurations
 - Developed and maintained internal software using **C#, JavaScript and ReactJS**
 - Executed database queries and maintenance on **SQL Server**, ensuring operational data integrity
-

Projects

Metrifica — Own Product

Smart management and budgeting system for professionals who work with measurements. Property registration, floor plans with automatic m² calculations, PDF budget and receipt generation with flexible payment terms. Installable PWA with authentication and cloud database. **Stack:** React, TypeScript, Supabase, TailwindCSS, jsPDF, React Hook Form, Zod, TanStack Query **Link:** metrifica.vercel.app

Delpupo Homes — Luxury Construction

Institutional website with premium design and high-end property showcase. **Stack:** React, Next.js, TypeScript, TailwindCSS **Link:** delpupohomes.com

Education

Computer Engineering — UNIP (Universidade Paulista) Bachelor's · Paused at 7th semester
Foundation in programming logic, data structures, algorithms and problem-solving.

Courses & Certifications

- Discovery | Web Development – **Rocketseat**
- Next.js Fundamentals – **Rocketseat**
- HTTP & Performance – **Rocketseat**
- Mastering Tailwind | React – **Rocketseat**
- Figma for Devs – **Rocketseat**
